

Teemu Lehtinen, M.Sc. (Tech.)

Teemu Lehtinen is a doctoral candidate at SimLab, Department of Industrial Engineering and Management, Aalto University School of Science, Finland and recently a visiting scholar at Global Projects Center (GPC), Stanford University. His research focuses on understanding the dynamics of different contingencies in managing inter-organizational project networks, especially the interplay between contractual, organizational and technological integration mechanisms. He has been studying relational project delivery arrangements such as integrated project delivery (IPD) projects in California and project alliancing in Finland from the perspectives of contracting, team co-location and joint decision making. He will defend his doctoral dissertation in 2016.
